Subject: RE: Weekly Joint Station Ash Water Treatment Team Meeting
All,

There are three notification requirements related to startup and operation of the treatment systems at Brema and Possum Point:

1. \geq 72 hours prior to the start of drawdown in the North Pond or Pond D in preparation of pond closure
2. Within 24 hours following initiation of the drawdown in 1.
3. \leq 14 days following completion of the construction of the wastewater treatment systems

Ken

Brema

5. Concept Engineering Report (CER) Requirement (Outfalls 001, 002, 003, 004, 006, 101, 202, 501, 502, 503, 504, and 505) – Prior to constructing any wastewater treatment works, the permittee shall submit a

00009881

CER to the DEQ-Valley Regional Office. DEQ approval shall be secured prior to constructing any wastewater treatment works. The permittee shall construct the wastewater treatment works in accordance with the approved CER. No later than 14 days following completion of construction of any project for which a CER has been approved, written notification shall be submitted to the DEQ-Valley Regional Office certifying that, based on an inspection of the project, construction was completed in accordance with the approved CER. The written notification shall be certified by a professional engineer licensed in the Commonwealth of Virginia or signed in accordance with Part II.K of this permit. The installed wastewater treatment works shall be operated to achieve design treatment and effluent concentrations. Approval by DEQ does not relieve the owner of the responsibility for the correction of design and/or operational deficiencies. Noncompliance with the CER shall be deemed a violation of this permit.

24. North Ash Pond Notification – The permittee shall notify the DEQ-Valley Regional Office at least 72 hours prior to the planned commencement of the discharge to draw down the water elevation in the North Ash Pond in preparation of pond closure. A second notification to the DEQ Valley Regional Office shall be provided within 24 hours of initiating the discharge to draw down the water elevation in the North Ash Pond.

Possum Point

22. Conceptual Engineering Report (CER) Requirement (Internal Outfall 503).

Prior to constructing any wastewater treatment works, the permittee shall submit a final CER to the DEQ - Northern Regional Office. DEQ approval shall be secured prior to constructing any wastewater treatment works. The permittee shall construct the wastewater treatment works in accordance with the approved CER. No later than 14 days following completion of construction of any project for which a CER has been approved, written notification shall be submitted to the DEQ - Northern Regional Office certifying that, based on an inspection of the project, construction was completed in accordance with the approved CER. The written notification shall be certified by a professional engineer licensed in the Commonwealth of Virginia or signed in accordance with Part II.K of this permit. The installed wastewater treatment works shall be operated to achieve design treatment and effluent concentrations. Approval by DEQ does not relieve the owner of the responsibility for the correction of design and/or operational deficiencies. Noncompliance with the CER shall be deemed a violation of this permit.

16. Ash Pond Dewatering

The permittee shall notify the DEQ - Northern Regional Office at least 72 hours prior to the planned commencement of the discharge to draw down the water elevation in Ash Pond D in preparation of pond closure. A second notification to the DEQ - Northern Regional Office shall be provided within 24 hours of initiating the discharge to draw down the water elevation in Ash Pond D.
